

2022 Quarter – Sunshine Award Honoree

Award Recipient: Ariana Ibarbol – Patient Access

Description of action taken by nominee that qualified for this award:

Ariana went above and beyond to get a patient to come back into the hospital to receive an urgent surgery. Please see the comment from the Surgeon:

We were able to successfully complete his surgery today. All your hard work, effort, and time paid off for him. There was actually quite a bit of dirt and debris in his bone and in the wound so getting it done today instead of next week may have been crucial in preventing infection. An infection would likely mean amputation. Just wanted to let you know you made a big and direct difference in helping him, even though he will never realize.

Nominated By: Stephanie Angel

Date: 05/20/22
