

COVID-19 Testing in the ED, Urgent Care, OB Screening Room

Symptom screen for Covid-19: fever, cough, shortness of breath, new loss of taste or smell, runny nose, sore throat, abdominal pain, diarrhea, myalgias, severe fatigue, household contact to known Covid-19 case, chest imaging suggestive of Covid-19 disease

^a Certain surgeries or procedures to be performed within 72 hours may also be an indication for a surveillance test but will vary by case

^b Surgical mask is appropriate for most HCW who enter a patient's room while surveillance testing is underway. Gown, gloves, and eye protection should also be used when collecting the test

^c Some units maintain both Covid-19 positive and negative patients.
