| Gl Bleeding | Referral Guide: <br> Page 1 of 1 | Gastroenterology |
| :--- | :--- | :--- |
| Diagnosis/Definition: |  |  |
| Any frank bleeding which is thought to originate in the GI tract, either from below (hematochezia or melena) or above (hematemesis |  |  |
| or coffee ground emesis or positive lavage). The source of GI bleeding will be diagnosed by doing an EGD (endo-gastro- |  |  |
| duodenoscopy) or a colonoscopy. |  |  |
| Initial Diagnosis and Management: |  |  |
| If the patient gives you a history of GI bleeding (frank blood or coffee ground emesis), ascertain time course, volume, hematocrit, |  |  |
| vital signs (including orthostatics), and then immediately call the GI lab (303-436-6877, during 8-4:30 M-F) and talk to the GI fellow. |  |  |
| If this is during the evening or on the weekend, then call the DHMC operator and ask for the GI fellow's pager number. |  |  |
| Ongoing Management and Objectives: |  |  |
| N/A |  |  |

## Indications for Specialty Care Referral:

Patients with hemodynamically significant GI bleeds need to be immediately referred to the GI service for evaluation which may include an urgent endoscopy.
