

2019 Substance-Related Projects

As part of Denver Health's Center for Addiction Medicine (CAM), we are creating an inventory of Denver Health projects that are substance use related. We have queried Cayuse and QuIRC for projects that have either been funded or have been through our internal project review process and asked CAM champions to add anything missing from their respective departments. The following list includes 67 active projects, some of which started prior to the CAM being established.
