Denver Health Recognized on Newsweek's List of America's Best Maternity Hospitals 2026

DENVER (June 11, 2026) — Denver Health has been recognized on [Newsweek's list of America's Best Maternity Hospitals 2026](#), a national distinction honoring hospitals that deliver exceptional care from pregnancy through birth and postpartum.

High-quality maternity care is essential to the long-term health of newborns and the women who give birth. To identify the nation's leading hospitals, Newsweek and Statista evaluated facilities across three key areas:

- **Hospital Quality Metrics** focused on indicators specific to maternity care.
- **Patient Experience** drawn from public hospital survey data.
- **Reputation Score** based on recommendations from maternity care professionals, including neonatal and perinatal physicians, nurses and midwives.

“Denver Health is here for every step of life’s journey, and we take great pride in being the birthplace for one out of three babies born in Denver,” said Stefka Fabbri, MD, chair of Obstetrics and Gynecology at Denver Health. “To be recognized on this year’s list is a meaningful affirmation of the extraordinary work our teams do every day. This honor reflects our unwavering commitment to providing high-quality, compassionate and equitable care for every family. Being included among the nation’s best reinforces our leadership in maternity care and our dedication to supporting healthy beginnings for our entire community.”

Denver Health is proud to be ranked among the best in the United States, as verified by Statista, a global leader in data and industry rankings that partners with major media outlets worldwide. Statista’s rigorous methodology and extensive analysis of hospital performance ensure that the America’s Best Maternity Hospitals list reflects true excellence across the field.

Denver Health provides comprehensive maternity services to thousands of families each year, including prenatal care, labor and delivery, postpartum support and specialized care for high-risk pregnancies. The health system’s integrated model ensures patients receive coordinated, evidence-based care.
